SUMMARY

I specialize in creating intuitive digital products by combining design aesthetics with powerful technical solutions. My approach is based on a deep analysis of user experience and a commitment to functional simplicity. I help brands transform complex ideas into elegant interfaces that work effectively on any device.

EXPERIENCE

Lead Frontend Developer & UI Designer | TechStudio Inc.

2024 – Present

- Engineered a modern design system using React and Tailwind CSS, reducing component development time by 40%.
- Collaborated with product teams to design and implement interactive data visualizations and high-performance video-based preview cards.
- Mentored junior developers and established high standards for clean code architecture.

UI/UX Engineer | PixelCraft Media

2021 – 2024

- Designed and developed 15+ responsive web applications for international brands.
- Optimized Core Web Vitals scores, improving landing page load speeds by 2.1s.
- Conducted user research, wireframing, and interactive prototyping in Figma to increase conversion rates by 15%.

EDUCATION

B.S. in Computer Science | State University 2017 - 2021
